Batch, Serial & Lot Allocation (BSL)

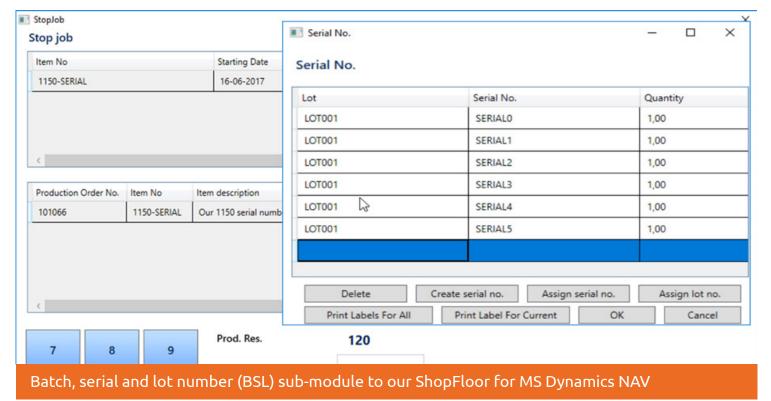

Batch, serial and lot number (BSL) sub-module to our ShopFloor for MS Dynamics NAV

Allocate batch, serial and lot numbers to your items - traceability for your clients and your internal processes

Traceability is Necessary in Todays Manufacturing

This sub-module to our ShopFloor operator terminal offers you traceability on delivered products, which is required in many industries, and an advantage in your pursue for an optimal supply chain.

Features and Main Functionalities

- Direct allocation of batch, serial and lot numbers via the operators' ShopFloor terminal
- Allocation of new batch, serial and lot numbers to your finished products
- The ability to track produced, purchased and delivered items, and to recall if necessary
- With NAVEKSA Q&A module, you can create certificates with relevant track numbers

Compatible with current versions of NAVEKSA ShopFloor for MS Dynamics NAV

This module can be implemented in few hours (plug and play). The module does not make any changes to a standard MS Dynamics NAV solution.

NAVEKSA
